

FELIPE BRENES CONEJO

JUNIOR SOFTWARE ENGINEER | BACKEND / FULL STACK

Alajuela, Costa Rica | +506 72055622 | felipebrenes721@gmail.com

PROFESSIONAL SUMMARY

Computer Engineering professional with 2 years of experience in Software Quality Assurance, testing both products and the applications used to control them. Experienced in functional and regression testing, test plans, test cases, defect analysis, bug reporting, and fix validation using TestLink. Hands-on development experience with C#, ASP.NET MVC, Java, SQL, JavaScript, and relational databases through academic and personal projects. Strong understanding of software quality, debugging, validation, and the software development lifecycle. Seeking a Junior Software Engineer or Backend Developer role where I can contribute to building reliable software while continuing to grow as a developer.

TECHNICAL SKILLS

Programming: C#, Java, Python, JavaScript, SQL, HTML5, CSS3

Backend / Frameworks: ASP.NET MVC, ASP.NET MVC, Node.js, Bootstrap

Databases: SQL Server, MySQL

Development Tools: Git, GitHub, Linux, Visual Studio, VS Code, NetBeans, TestLink

Networking: Cisco IOS, VLANs, DHCP, IPv6, GNS3

Quality: Manual Testing, Functional Testing, Regression Testing, Test Plans, Test Cases, Defect Reporting, Fix Validation, TestLink

PROFESSIONAL EXPERIENCE

Software Quality Assurance Tester — Bounce Imaging | 2024–Present

- Perform manual software and hardware testing of products and the applications used to control them, validating functionality and expected behavior.
- Execute functional and regression testing using defined test plans and test cases.
- Analyze, reproduce, document, and report software defects found during product and application testing.
- Collaborate with development teams to verify bug fixes and confirm expected behavior after changes.
- Use TestLink to manage and execute test cases and support release validation to ensure products and controlling applications perform as expected.

SELECTED PROJECTS

Hotel Management Platform — C#, ASP.NET MVC, SQL Server

- Developed a web-based hotel management application using the MVC architecture.
- Implemented CRUD functionality for customers, employees, rooms, and reservations.
- Designed relational data models and implemented application data management with SQL Server.
- Implemented server-side validation and application business rules.

Java Lexical Analyzer — Java

- Developed a Java-based lexical analyzer capable of token recognition and lexical error detection.
- Implemented validation and analysis logic for source-code structures as part of a compiler project.

Enterprise Network Infrastructure — Cisco IOS, GNS3

- Designed and configured a network environment using VLANs, DHCP, IPv6, and router-on-a-stick.
- Configured and validated connectivity between segmented network environments in GNS3.

EDUCATION

UNED — Bachelor's Degree in Computer Engineering | Expected 2026

Diploma in Information Technology

LANGUAGES

Spanish: Native English: B2
